

How to prevent virus in your Pendrive/Flash Memory/MMC from infecting your PC

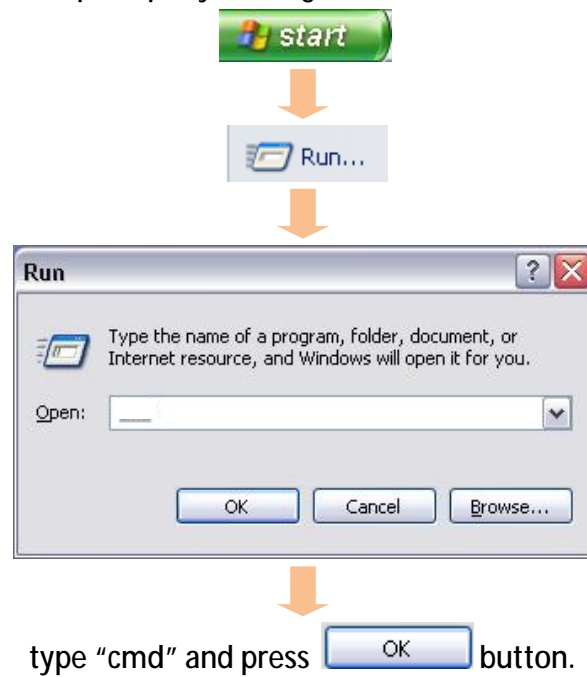

Just follow through these 12 steps...

1. When you connect a pendrive to your PC or laptop a prompt window will appear.

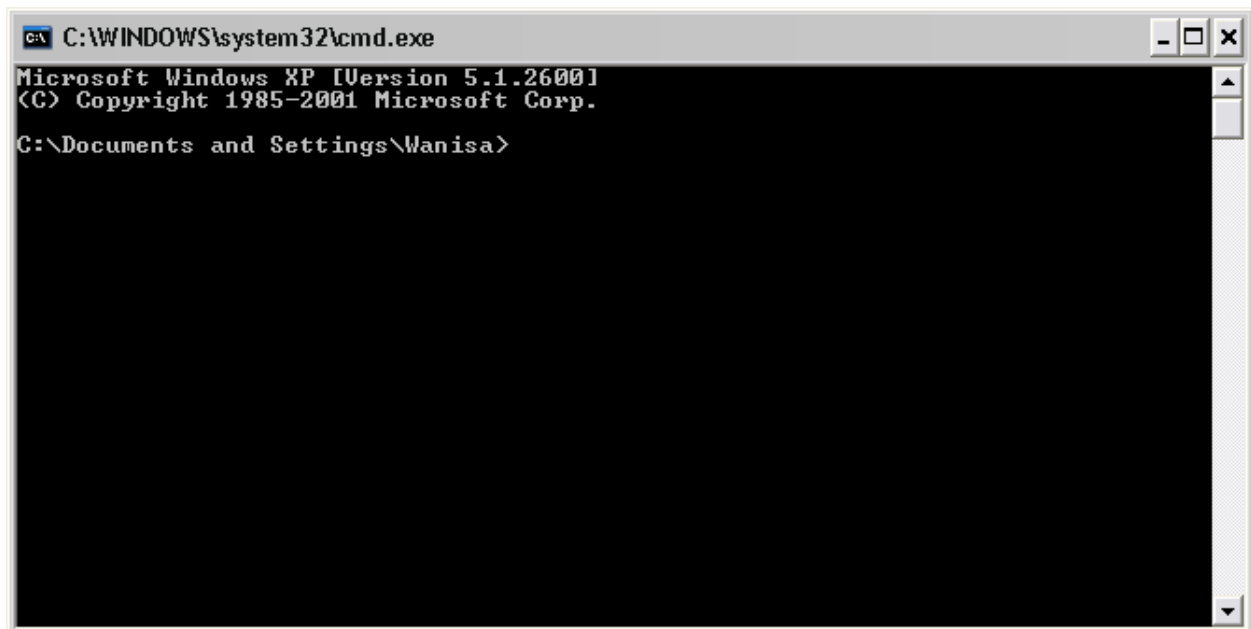

2. Immediately close the prompt window by pressing the  button or  button.

3. Next open a command prompt by clicking:

4. A command prompt window will appear on your screen.

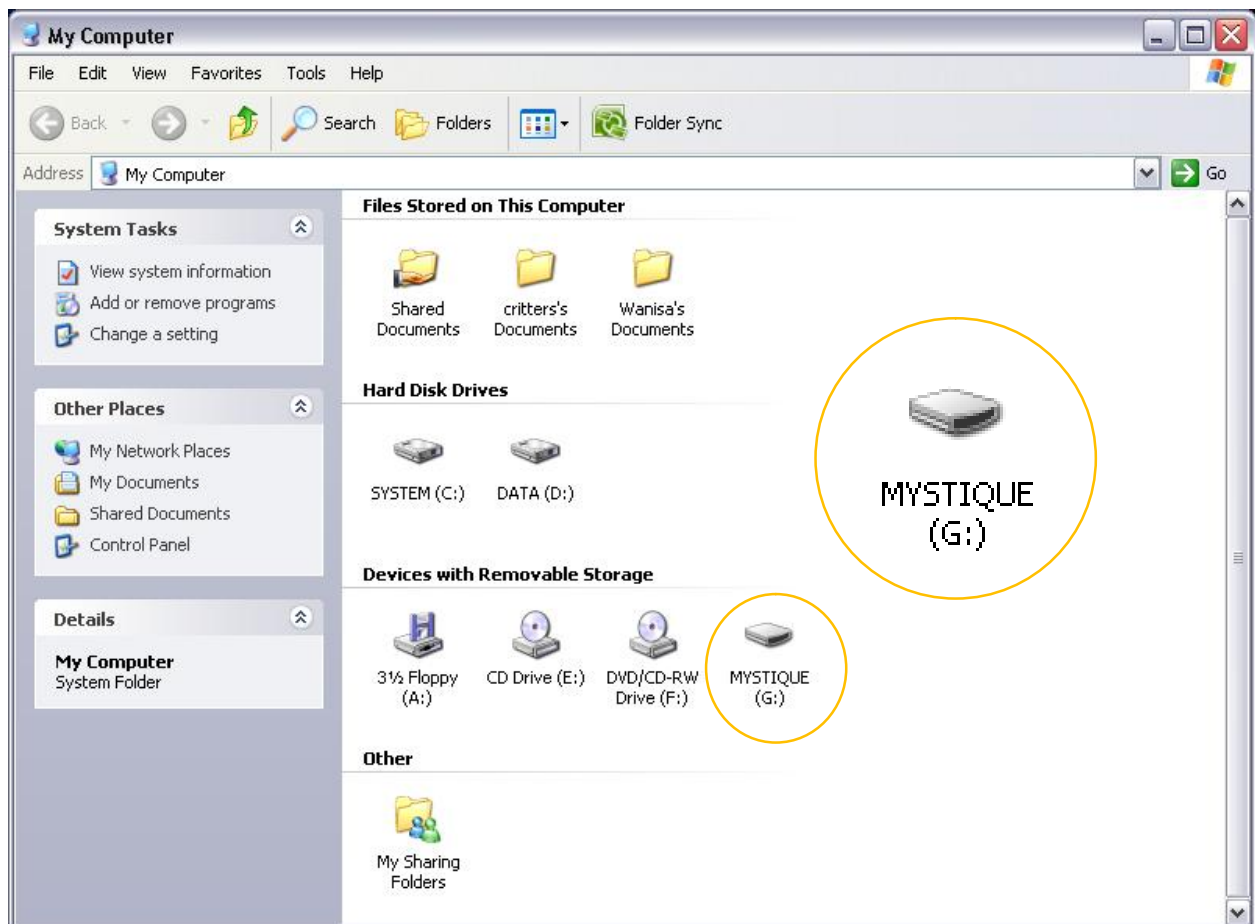

5. Next minimize your command prompt window by clicking  button and click on

icon on your desktop or start menu.

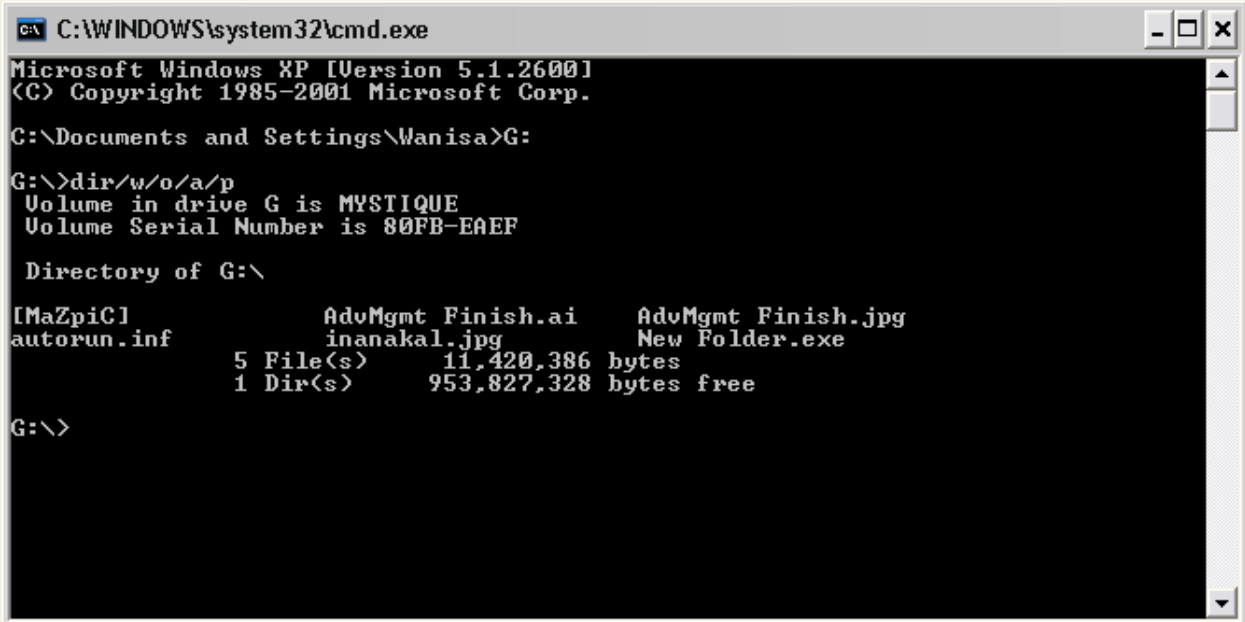

6. When your Windows Explorer window shows up, look for your pendrive drive letter. For instance, referring from the picture below my pendrive drive letter is G.

7. Then, maximize your command prompt window and type the following command:

- 1) "G:" without the double quote and press <enter>
- 2) "dir/w/o/a/p" without the double quote and press <enter>

**refer to the illustration below*

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows XP [Version 5.1.2600.1
(C) Copyright 1985-2001 Microsoft Corp.

G:\Documents and Settings\Wanisa>G:

G:\>dir/w/o/a/p
Volume in drive G is MYSTIQUE
Volume Serial Number is 80FB-EAEP

Directory of G:\

[MaZpiC]          AdvMgmt Finish.ai      AdvMgmt Finish.jpg
autorun.inf       inanakal.jpg             New Folder.exe
                5 File(s)              11,420,386 bytes
                1 Dir(s)              953,827,328 bytes free

G:\>
```

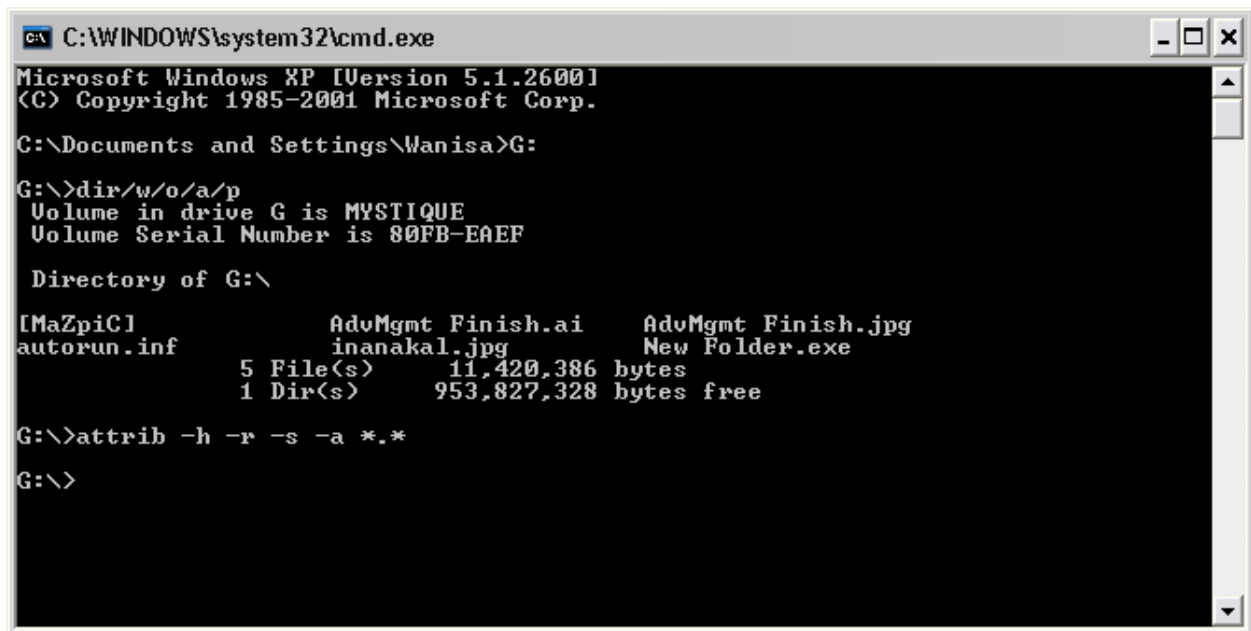

8. On the command prompt screen, look for filename with the following name:

- i. Autorun.inf
- ii. New Folder.exe
- iii. Bha .vbs
- iv. Iexplore.vbs
- v. Info.exe
- vi. New_Folder.exe
- vii. RavMon.exe
- viii. RVHOST.EXE

9. If you found any of the mention filenames please perform the following command:

"attrib -h -r -s -a *.*" without the double quote and press <enter>

**refer to the illustration below*

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.

C:\Documents and Settings\Wanisa>G:

G:\>dir/w/o/a/p
Volume in drive G is MYSTIQUE
Volume Serial Number is 80FB-EAEF

Directory of G:\

[MaZpiC]          AdvMgmt Finish.ai          AdvMgmt Finish.jpg
autorun.inf       inanakal.jpg             New Folder.exe
                  5 File(s)                11,420,386 bytes
                  1 Dir(s)                 953,827,328 bytes free

G:\>attrib -h -r -s -a *.*

G:\>
```

10. Then delete the file using the following command:

```
del <filename>
```

example:

```
del autorun.inf  
or  
del "New Folder.exe"
```

** refer to the illustration below*

```
C:\WINDOWS\system32\cmd.exe  
Microsoft Windows XP [Version 5.1.2600]  
(C) Copyright 1985-2001 Microsoft Corp.  
C:\Documents and Settings\Wanisa>G:  
G:\>dir/w/o/a/p  
Volume in drive G is MYSTIQUE  
Volume Serial Number is 80FB-EAEF  
  
Directory of G:\  
  
[MaZpiC]          AdvMgmt Finish.ai      AdvMgmt Finish.jpg  
autorun.inf       inanakal.jpg           New Folder.exe  
                  5 File(s)              11,420,386 bytes  
                  1 Dir(s)              953,827,328 bytes free  
  
G:\>attrib -h -r -s -a *.*  
G:\>del autorun.inf  
G:\>_
```

11. And now you are free to scan your pendrive using your favorite antivirus software. If you don't have any try download the antivirus software from the internet.

Nod32 – <http://www.eset.com>

Symantec – <http://www.symantec.com>

AVG – http://www.grisoft.com/us/us_dwnl_free.php

Mcafee – <http://www.mcafee.com>

12. Finally after finish scanning using your antivirus software, please eject your pendrive/flash memory/MMC and plug it back to your PC/Laptop before using it.
